

# Festool Saw Blades

Festool produces a wide variety of blades to suit the extensive range of saws. What we're going to do here is to go through the the range available for the TS55R and give you a guide as to which blade works best for which application so you can make an informed choice and get the right blade for your job

---

## 491952 Standard Blade

Timber Green inner band  
Broken Yellow outer band

This 48 tooth blade is the one supplied with the TS55R and is ideal for fine cuts in plywood and sheet materials as well as crosscut work on natural timbers.

---

## 496302 Universal Blade

Timber Green inner band  
Broken Yellow outer band

The 28 tooth universal blade is an ideal general purpose blade for coarse cuts in plywood and sheet materials as well as crosscut and rip applications in natural timbers

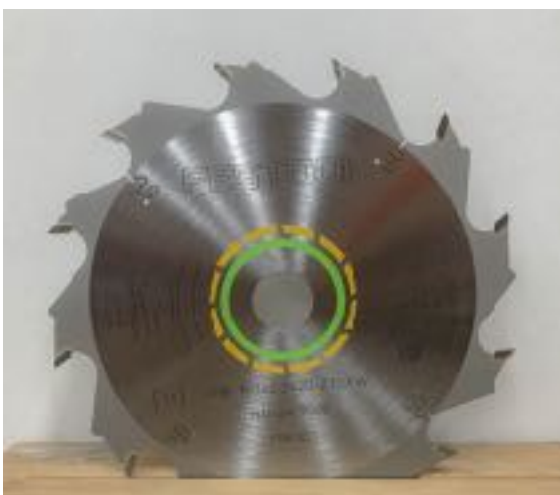

---

## 496301 Panther, coarse cut

Timber Green inner band  
Broken Yellow outer band

The 12 tooth panther blade offers faster cutting with less force required. Ideal for coarse cuts in sheet materials as well as rip cuts in both hard and soft timbers

---

### 496306 Aluminium Blade

Green Inner Band  
Blue Outer Band

This 52 tooth blade is the ideal choice for both aluminium sheet and profile materials. It can also be used on fibreglass and GRF panel materials.

---

### 496308 Laminates & Plastics .

Green inner Band
